

Quarterly Population Highlights

A release from the Province of British Columbia's central statistical agency

REFERENCE DATE: OCTOBER 1, 2013 | ISSUE #13-03

B.C. HIGHLIGHTS:

British Columbia's population was estimated at 4,606,375 as of October 1, 2013, growing by just over 24,000 persons in the third quarter of 2013 (+0.53%). This is the strongest third quarter growth since 1996. Driving this increase was the net gain of 15,477 non-permanent residents (NPR) to British Columbia. This is a record net gain, however NPRs are a volatile component of population growth and large changes should be interpreted cautiously. Interprovincially B.C. lost an estimated 282 net persons to other Canadian jurisdictions for the seventh consecutive quarterly net loss. Twenty percent of population growth during the third quarter was due to natural increase (births minus deaths).

B.C. Population July 1, 2013	4,581,978
Interprovincial migration	- 282
Add interprovincial arrivals	+ 13,008
Minus interprovincial exits	- 13,290
International migration	+ 20,897
Add immigrants	+ 8,933
Minus total net emigrants	- 3,513
Add net change in non-permanent residents	+ 15,477
Natural increase	+ 3,782
Add births	+ 11,497
Minus deaths	- 7,715
B.C. Population October 1, 2013	4,606,375

THE LAST TWELVE MONTHS:

B.C.'s total population increase over the twelve months ending October 1, 2013 was 47,496 persons, largely due to international migration. Immigrants (+35,609) and non-permanent residents (+18,054) continue to be steady providers of population growth for the province. Interprovincial migration accounted for a net loss of 5,385 persons over the same period. Total net migration accounted for nearly 80% (+36,282) of the population growth since October 1, 2012. The remainder was due to natural growth (+11,214).

NATIONAL OVERVIEW:

The population of Canada grew by a record 137,466 persons (+0.39%) to 35,295,770 during the third quarter of 2013. Leading the growth at the provincial level was Alberta (+0.89%), B.C. (+0.53%) and Saskatchewan (+0.53%) followed by Ontario (0.35%), Manitoba (+0.31%) and Quebec (+0.24%). The populations of Newfoundland and Labrador (+0.14%) and Prince Edward Island (+0.04%) reported small gains while New Brunswick (-0.04%) and Nova Scotia (-0.02%) reported population declines.

Quarterly Population Highlights – continued...

THIRD QUARTER INTERNATIONAL MIGRATION:

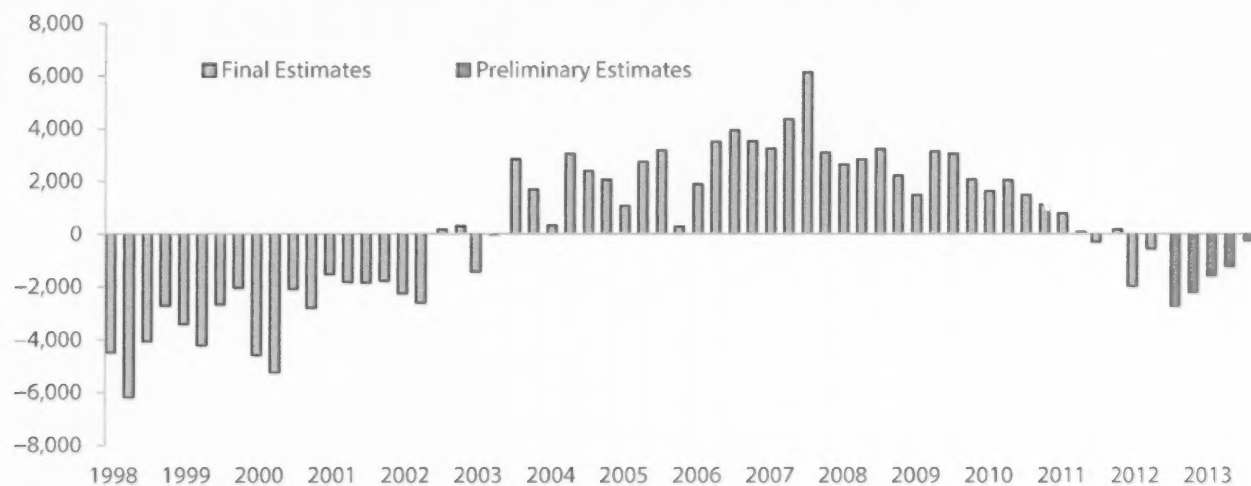

Third quarter net international in-migration reached its highest level since at least 1971. A little less than nine thousand persons (8,933) immigrated to British Columbia during the third quarter of 2013, offset by about 3,600 persons who emigrated. The net change in non-permanent residents (NPRs) rose to 15,477—by far the highest quarterly net change in at least 42 years. This significant rise may be due to a new federal program (introduced in December 2012) that allows NPRs already in Canada, who are waiting for their permanent residency, to apply for an open permit that prolongs their stay in the country. As well, Citizenship and Immigration Canada has also confirmed that, in general, there was an overall increase in the number of NPRs to Canada in the third quarter.

Immigration from Asia for the third quarter has slowed in recent years, dropping roughly 40% from levels witnessed in 2010. European immigration also dropped but at a slower rate, while the number of immigrants from Africa is roughly the same over a similar period. The decline in third-quarter immigration from some of the top countries is as a result of a drop in overall immigration, as these top countries still supply B.C. with about eight in every ten immigrants. Most immigrants were accepted under the classes of family (34%), skilled worker (20%) and provincial/territorial nominee (21%).

THIRD QUARTER INTERPROVINCIAL MIGRATION:

British Columbia was one of eight provinces that reported a net loss of population (-282) to other Canadian jurisdictions; in B.C. an inflow of 13,008 persons was slightly offset by an out flow of 13,290. British Columbia's net exchange with Alberta was negative with an estimated 875 more persons leaving B.C. for Alberta than coming to B.C. Conversely, net in migration from Ontario (+129) and Quebec (+194) to B.C. was positive. Alberta was the biggest net person-recipient province in the third quarter of 2013 with a net gain of 10,269 persons far greater than the net inflow of 637 persons to Saskatchewan.

B.C. NET INTERPROVINCIAL MIGRATION BY QUARTER, Q1 1998 TO Q3 2013

DID YOU KNOW?

Non-permanent residents (NPRs) are foreign individuals who are legally granted the right to live in Canada on a temporary basis. They are mainly temporary workers and students, but this category also includes refugee claimants and persons holding a minister's permit. In addition, the permits and authorizations may include coverage for family members of the principal document holder; these individuals are also considered part of the NPR population. As NPRs have played an increasingly important role in the economic development of Canada over the last few decades, Statistics Canada decided to include this population in the international migration component. The number of NPRs tends to fluctuate over time due to the temporary nature of the population and seasonality factors.
